List of Platform Features

A. Student Portal Features

- **Team Creation & Management:** Students can create teams for projects.
- **Project Submission:** Submit reports at various phases (proposal, mid, final).
- **Area of Interest & Supervisor Assignment:** The system assigns supervisors based on the project area of interest, matching the student's project domain.
- **Progress Tracking:** Visual timeline and logs to monitor ongoing project activities.
- **Notifications & Reminders:** Timely alerts about upcoming defenses and other important events.
- **Feedback & Comments:** View feedback received from supervisors and evaluators, including previous comments.
- **Archive Access:** View and access past projects and submissions.

B. Supervisor Portal Features

- **Project Monitoring:** Overview of assigned teams and projects.
- **Defense Comment & Feedback View:** Access comments and feedback from evaluators on student defenses.
- **Team Notifications:** Receive notifications of the teams assigned to them.
- **Guidance & Progress Verification:** Verify logs, approve defense permissions, and provide guidance.
- **Defense Scheduling:** Manage timelines for project defenses.
- **Overall Project Oversight:** Access to student reports, progress logs, evaluations, and defense comments.

C. Evaluator Portal Features

- **Defense Room Management:** Separate rooms or dedicated sections for different defense projects.
- **Evaluation Dashboard:** View projects scheduled for evaluation, along with their details.
- **Previous Feedback Access:** View past comments and evaluation feedback for ongoing or past projects.
- **Evaluation Submission & Grading:** Provide grades, comments, and feedback, which are stored for future reference.

- **Defense Monitoring:** Access defense schedules, logs, and associated project details.

D. Administrator Portal Features

- **Comprehensive Data Access:** Retrieve information about teams, projects, and students filtered by semester, faculty, or department.
- **Progress & System Monitoring:** Track project progress across departments and semesters.
- **User & Role Management:** Manage all users, including students, supervisors, evaluators, and admin staff.
- **Analytics & Reporting:** Generate detailed reports on project status, evaluation outcomes, and system usage.
- **Filters & Segregation:** View data segregated by faculty, semester, project area, etc.

E. Additional System-Wide Features

- **Notifications System:** Push notifications for upcoming defenses, system updates, and important messages across all portals.
- **API & Documentation:** Swagger UI for API access and developer support.
- **Real-Time Communication & Collaboration:** Facilitate collaboration and feedback sharing among stakeholders.
- **Automation:** Automate tasks such as notification dispatch, report generation, and scheduling.
